Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 line 6 "the vehicle" lacks positive antecedent basis.

In claims 11-20 recite limitations with respect to the vehicle and the fuel tank. However, neither of these elements have been positively claimed. Thus the claim recites limitations which depend on unclaimed subject matter. The claims have been treated as though they positively claim the vehicle and fuel tank.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. The claims include the use of the word "for" which indicates intended use. A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" if the prior art

Art Unit: 3611

apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ2d 1647

(Bd. Pat. App. & Inter. 1987).

If Applicant(s) desire to give the phrase patentable weight, the Examiner respectfully recommends Applicant(s) remove "for" from the phrase where intended use is not desired.

5. Claims 1-6, 8-16, 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 08-18585.

JP 08-18585 discloses a fuel tank mounting structure for a motorcycle wherein a fuel tank is disposed between a pair of left and right frame members 7 of a vehicle body frame and the fuel tank is mounted on the vehicle body frame via a plurality of tubular resilient bodies 25 comprising: the plurality of tubular resilient bodies 25 are disposed with axes of the tubular resilient bodies extending laterally of the vehicle; and at least one of the plurality of resilient bodies allows resilient support in the fore-and-aft direction and in the vertical direction of the vehicle and limits the movement in the lateral direction, and remaining resilient bodies allow resilient support both in the fore-and-aft direction and in the vertical direction of the vehicle, wherein each of said tubular resilient bodies includes a fastener 28 mounted relative thereto and further including a boss 24 for each of said plurality of tubular resilient bodies being secured to said fuel tank for securing the fastener to said fuel tank, wherein the at least one of the plurality of resilient bodies that allows resilient support in the fore-and-aft direction and in the vertical direction of the vehicle and limits the movement in the lateral direction includes a left flange 22 and a right flange 22.

Art Unit: 3611

Note, the phrase "limits the movement" is at best a broad limitation and is inherent between any two connected bodies.

Allowable Subject Matter

6. Claims 7 and 17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Hurley whose telephone number is 703-308-0233. The examiner can normally be reached on Monday-Friday 9:30-5:00.
